

POP3 Data Types

The functions [POP3FilterQueryContextData](#) and [POP3FilterSetContextData](#) accept a data item id to indicate which piece of data to set/get. The data is encapsulated inside a [FilterContextDataVariant](#) object.

Item	Description
POP3_DATA_SESSION_OBJ	The session object
POP3_DATA_USER_OBJ	The user object
POP3_DATA_SESSION_INTERCEPTED	Whether the connection was intercepted
POP3_DATA_SESSION_SECURE	Is connection secure or TLS
POP3_DATA_SESSION_CLIENTIP	Connected client IP
POP3_DATA_SESSION_LOCALIP	Connected local IP
POP3_DATA_COMMAND	The request method as an integer
POP3_DATA_COMMANDLINE	The protocol command line
POP3_DATA_RESPONSE	The protocol response
